Office Action Summary

Application No.

09/852,712

Applicant(s)

TOURRE ET AL.

Examiner

Shian T. Luong

Art Unit

3728

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 16-22, 30 and 31 is/are pending in the application.
- 4a) Of the above claim(s) 23-29 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 16-22, 30 and 31 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s) _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____ 6) ☐ Other:

Claim Rejections - 35 USC § 112

1. Claims 16-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "first fold line" lacks proper antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 16-22 and 30-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Admitted Prior Art shown in Figures 1-2 and disclosed on page 4 over Wewers (US 5,244,025) or Sipinen (US D463,975) and Williams. Admitted Prior Art discloses generally all of the elements of the claims, but lacks a square package and the folding method of the tissue. However, a change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. *In re Dailey et al.*, 149 USPQ 47. In addition, Wewers teaches a square shaped package for receiving contents therein. Wewers is only cited to show the shape and not the contents. Sipinen teaches a package for dispensing sheet. The package has a square-shaped configuration.

With respect to the folding direction, Williams teaches an absorbent paper as shown in Figure 3 wherein the paper is folded at line 16 and then respectively at 17. Thereafter, the

Art Unit: 3728

transversely folded paper may be folded along the longitudinal centerline 14 and then along the parallel equal spaced longitudinal fold line 15. In Figure 6, an alternative folding method is shown wherein the two outer panels formed by fold lines 17 are folded outwardly while the interior panels are folded in an opposing direction. The assembly displayed a M-shaped configuration when viewed from an end thereof. It would have been obvious to fold the absorbent paper in the manner as taught by Williams for the package of Admitted Prior Art to store the absorbent paper in a compact manner. Also, it would have been obvious to determine the desired height and width such as 50 and 58 mm, respectively, through routine experiment.

4. Claims 16-22 and 30-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Focke et al (US 5,018,625) or Regenstein et al (US 4,460,088) in view of Wewers (US 5,244,025) or Sipinen (US D463,975) and William. Focke et al disclose a package comprising packs for stacks of folded paper tissues. The package has perforations as a means for tearing open the package. An adhesive strip is attached to the front portion to provide a reclosable opening. Rugenstein also shows a soft pack consisting of a plastic film. Perforations 29,30 extending inwardly from corners 27,28 of the pack. An adhesive strip 40 is applied to facilitate reclosing. Neither Focke et al or Regenstein et al disclose a square package. However, a change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. *In re Dailey et al.*, 149 USPQ 47. In addition, Wewers teaches a square shaped package for receiving contents therein. Notice that Wewers is only cited to show the shape and not the contents. Sipinen teaches a package for dispensing sheet. The package has a square-shaped configuration.

Art Unit: 3728

With respect to the folding direction, Williams teaches an absorbent paper as shown in Figure 3 wherein the paper is folded at line 16 and then respectively at 17. Thereafter, the transversely folded paper may be folded along the longitudinal centerline 14 and then along the parallel equal spaced longitudinal fold line 15. In Figure 6, an alternative folding method is shown wherein the two outer panels formed by fold lines 17 are folded outwardly while the interior panels are folded in an opposing direction. The assembly displayed a M-shaped configuration when viewed from an end thereof. Hence, it would have been obvious in view of Sipinen or Wewers and William to provide square shaped package for the package of Regenstein et al or Focke et al since they would work equally well and to store the tissue papers in a compact storage position. Also, it would have been obvious to determine the desired height and width such as 50 and 58 mm, respectively, through routine experiment.

Conclusion

5. Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners, M.P.E.P. 203.08. The **Group clerical receptionist number is (703) 308-1148** or the **Tech Center 3700 Customer Service Center number is (703) 306-5648**.

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g., copies of references cited, form PTO-1449, form PTO-892, etc., requests for copies of such papers should be directed to Donna Monroe at (703) 308-2209.

Art Unit: 3728

For applicant's convenience, the Group Technological Center FAX number is (703) 872-9302 and for After Final Amendment the number is (703) 872-9303. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify Examiner Luong of Art Unit 3728 at the top of your cover sheet of any correspondence submitted.

Inquiries concerning the merits of the examination should be directed to Shian Luong whose telephone number is (703) 308-2039. The examiner can normally be reached on T-F from 7:00am to 4:00pm EST.
